Hands-on Projects

SET - 4

1. Develop a PHP application where users can submit feedback through a form, and the feedback is stored in a MySQL database.
 - a) The form should collect the user's name, email, and feedback.
 - b) Display all submitted feedback on a separate page, retrieving the data from the database.

Or
2. Create a PHP project where users can register for an event.
 - a) The registration form should collect the user's name, email, and event choice.
 - b) Store the data in a MySQL table and display all registered users in a table format.
