Hands-on Projects

SET - 3

1. Create a simple to-do list application using PHP and MySQL.

- a) The application should allow users to add tasks, display them, update their status (completed/incomplete), and delete tasks.
- b) Use a MySQL table to store tasks with fields such as `id`, `task_name`, and `status`.

Or

2. Build a basic contact management system using PHP and MySQL.

- a) The system should allow users to add, view, update, and delete contact information.
- b) The contacts table should have columns for `id`, `name`, `phone_number`, and `email`.
- c) Display the contacts in a table format on the web page.
